PROFESSIONAL SUMMARY

Senior Full Stack Developer with 5+ years of experience designing, building, and deploying enterprise web applications in the UAE and India across media analytics, warehouse management (WMS), HRMS, e-commerce, fintech, and logistics. Hands-on across the full stack: Python/Django, PHP/Laravel, Node.js, React, Next.js, Angular, and TypeScript, backed by REST API design, PostgreSQL/MySQL, Docker, CI/CD, and AWS/Google Cloud. Experienced with enterprise integrations including SAML 2.0 SSO, SAP EWM, Google BigQuery, and OpenAI API. Known for shipping secure, scalable, production-ready systems with measurable business impact. CCNA certified.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, C#, SQL, Dart, HTML5, CSS3

Frontend: React.js, Next.js, Angular, AngularJS, Tailwind CSS, Bootstrap, jQuery, Responsive Web Design

Backend: Django, Django REST Framework, Laravel, Node.js, Express.js, Flask, .NET, REST APIs, Celery, Redis

Databases: PostgreSQL, MySQL, MS SQL Server, MongoDB, SQLite, Google BigQuery

Cloud and DevOps: AWS, Google Cloud Platform (GCP), Docker, Docker Compose, CI/CD, GitLab CI, Git, GitHub, Nginx, Linux, PM2, IIS, Cloudflare, SSL/DNS

Integrations and AI: OpenAI API (ChatGPT), SAML 2.0 SSO, OAuth2, JWT Authentication, SAP EWM, Zoho API, Razorpay, BigQuery Data Pipelines

Mobile: Flutter (Android), Firebase, AdMob, Google Play Billing

Practices: System Design, RBAC, Application Security, Performance Optimization, Code Review, Technical Documentation

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer

Jan 2026 – Present

MEDPUSH MENA FZCO | Dubai, UAE

- Built a campaign analytics platform with AI-generated KPI commentary, cross-platform pacing dashboards, a budget optimizer, and role-based access control (RBAC) using Django, Angular, Google BigQuery, and Docker.
- Developed a government media intelligence hub with SAML 2.0 SSO, an automated BigQuery sync pipeline, and Celery task scheduling on secured infrastructure (Django, Next.js).
- Delivered a unified agency workspace (Next.js, Django) with SSO and third-party social listening integration.
- Engineered an agency evaluation platform with a weighted scoring engine, bidirectional surveys, and auto-generated branded PowerPoint reports (Laravel, python-pptx).
- Created a pitch management tool that ingests multi-agency proposals and auto-generates Excel master files for stakeholder review (Laravel, PhpSpreadsheet).
- Built a biometric attendance sync dashboard integrating cloud HR via OAuth2 REST APIs, with real-time sync reporting (Python, Flask, Zoho API).
- Led security and performance hardening of production Django services: JWT on all ML endpoints, CORS and host hardening, secrets moved to environment config, and an N+1 query fix reducing 80 queries to 1.

Senior Full Stack Developer

Nov 2023 – Dec 2025

MEF Middle East Fuji LLC | Dubai, UAE

- Integrated a warehouse management system (WMS) with SAP EWM to automate order fulfillment for 10,000+ SKUs, including scanner hardware REST APIs; achieved 60% faster processing and 99.7% picking accuracy.
- Built an HRMS with ChatGPT-powered features covering leave management, payroll automation, biometric attendance, and an employee self-service portal, contributing to a 45% faster hiring cycle.
- Developed an e-commerce platform with AI product recommendations and real-time inventory management serving 5,000+ users at 99.8% uptime.
- Built an inventory management system with automated reordering, purchase orders, multi-warehouse support, and e-commerce integrations.
- Managed AWS and GCP infrastructure, reducing cloud costs by 30%; configured Cloudflare, IIS, and SSL for 20+ production domains.

Junior Full Stack Developer

May 2021 – Oct 2023

Influence Web Solution | Tamil Nadu, India

- Built 15+ web applications using React.js, JavaScript, Python, and PHP for e-commerce, HRMS, and retail clients.

- Designed architecture for billing, POS, real estate portals, and corporate websites with responsive, cross-browser front ends.
- Developed REST APIs integrating 8+ internal systems across MySQL, MongoDB, and SQLite, improving query performance by 45%.
- Resolved 150+ production issues and configured domains, DNS, and SSL for 20+ client projects.

SELECTED PROJECTS

E-Commerce Platforms (Django, Laravel, React.js, Next.js): web architecture for multiple e-commerce platforms with AI-powered product recommendations; 32% increase in conversion rate and 55% faster page loads.

Warehouse Management System (React.js, Node.js, PHP, MS SQL Server): enterprise WMS with SAP EWM integration managing 10,000+ SKUs; 60% reduction in processing time and 99.7% picking accuracy.

HRMS with ChatGPT AI (PHP, Python, ChatGPT AI, MS SQL Server): human resource management system with AI integration and automated payroll processing; 45% reduction in hiring time.

Project Management Software (Laravel, MySQL, REST API): project management platform supporting 50+ team members with Kanban boards, Gantt charts, time tracking, and multiple integrations.

Logistics Application (React.js, TypeScript, Node.js, MySQL, Google Maps API): real-time vehicle tracking and route optimization system; 40% reduction in runtime errors.

Inventory Management System (React.js, Node.js, MongoDB): cloud-based inventory system with automated reorder notifications, purchase order management, and multi-platform integration.

Corporate Websites (WordPress, Laravel): designed and built 10+ corporate websites with modern, responsive web design.

Solar Energy Management (Enterprise web application): solar energy management platform with real-time monitoring dashboards for power output, panel efficiency, and energy production and consumption.

EDUCATION

Master of Computer Applications (MCA) , Anna University, India	2021 – 2023
Bachelor of Science (BSc), Computer Technology , Bharathiar University, India	2018 – 2021

CERTIFICATIONS

- CCNA (Cisco Certified Network Associate), KHDA Dubai
- MERN Stack Development (MongoDB, Express.js, React.js, Node.js), GUVI
- Google Digital Marketing Certification (SEO, SEM, Analytics)
