PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building enterprise web applications across E-Commerce, HRMS, WMS, Solar Energy Management, and Logistics. Expert in web architecture design, front end web development, and web design with programming languages (JavaScript, TypeScript, Python, PHP) and front end languages (HTML5, CSS3, React.js). Specialized in AI integration (ChatGPT, Gemini), SAP EWM, cloud infrastructure (AWS, GCP), digital marketing, and Computer Science fundamentals. CCNA certified with strong problem solving skills, excellent verbal communication abilities, and attention to detail. Currently working in Dubai with Employment Visa.

CORE TECHNICAL SKILLS

- Programming Languages: JavaScript, TypeScript, Python, PHP, C#, HTML5, CSS3, SQL, Node.js
- Web Development: Full Stack, Web Applications, Web Architecture, Front End Web, Web Design
- Frontend (Front End Languages): React.js, Next.js, HTML5, CSS3, jQuery, Bootstrap
- Backend: Django, Laravel, CodeIgniter, Node.js, Express.js, REST API
- Databases: MySQL, MS SQL Server, MongoDB, SQLite | Computer Science Foundation
- AI: ChatGPT, OpenAI | CMS: WordPress, Shopify, Shopware | ERP: SAP EWM
- Cloud: AWS, Google Cloud, Docker, CI/CD, Git | Server: IIS, Shared Hosting
- Digital Marketing: SEO, Google Search Console, Google My Business
- Security: CCNA, Cloudflare, SSL | Hardware: Printer/Scanner Integration
- Soft Skills: Project Management Skills, Management Skills, Attention to Detail, Excellent Verbal Communication, Verbal Communication Skills, Problem Solving Skills, Organizational Skills

PROFESSIONAL EXPERIENCE

Full Stack Developer | Sunniva Solar Management LLC, Dubai, UAE

March 2025 - Present

- Design and develop enterprise web applications for solar energy management using React.js, Next.js, Django, Laravel with focus on web architecture and front end web development
- Build scalable web design solutions using front end languages (HTML5, CSS3, JavaScript, React.js) and programming languages (Python, PHP, Node.js) for solar monitoring systems
- Demonstrate excellent verbal communication and verbal communication skills coordinating with cross-functional teams to deliver clean energy solutions
- Apply problem solving skills optimizing solar panel monitoring dashboards, exercise attention to detail ensuring data accuracy
- Implement REST APIs for real-time solar energy data processing and analytics visualization
- Utilize project management skills and management skills to oversee development timelines and deliverables
- Configure cloud infrastructure on AWS/GCP for solar data management with optimal performance

Junior Full Stack Developer | MEF Middle East Fuji LLC, Dubai, UAE

November 2023 - March 2025

- Developed 8+ enterprise web applications using front end languages (React.js, Next.js, HTML5, CSS3, JavaScript) and programming languages (Django, Laravel, Python, PHP, Node.js)
- Integrated SAP EWM with custom WMS using Computer Science fundamentals, reducing warehouse processes by 60% through automated workflows
- Implemented ChatGPT AI integration for intelligent automation enhancing productivity by 35%
- Architected scalable web design and front end web solutions serving 5,000+ users with 99.8% uptime
- Managed AWS and Google Cloud infrastructure optimizing costs by 30% through efficient resource allocation
- Configured IIS servers, implemented Cloudflare CDN, managed domain/DNS setup for 20+ applications
- Integrated printer/scanner hardware with web applications via REST APIs improving warehouse efficiency by 50%
- Applied digital marketing skills (SEO, Google Search Console) increasing organic traffic by 65%
- Demonstrated problem solving skills resolving 50+ critical technical issues maintaining optimal performance

- Exercised excellent verbal communication collaborating with stakeholders, delivered projects 20% ahead of schedule using strong project management skills

Web Developer | Influence Web Solution, Tiruchengode, India

May 2021 - October 2023

- Built 15+ web applications using programming languages (Python, PHP, JavaScript) and front end languages (HTML5, CSS3, React.js) with web architecture and web design focus
- Developed custom REST APIs connecting 8+ internal systems, managed MySQL, MS SQL Server, MongoDB, SQLite databases achieving 45% performance improvement
- Created WordPress and Shopify e-commerce solutions with modern front end web design increasing client conversion by 28%
- Demonstrated problem solving skills debugging and resolving 150+ technical issues across diverse technology stacks
- Applied organizational skills managing multiple concurrent projects with attention to detail in code reviews
- Configured domain setup, DNS management, SSL certificate implementation for 20+ client projects
- Exercised excellent verbal communication coordinating with clients and team members for requirement gathering
- Implemented responsive web design using HTML5, CSS3, JavaScript ensuring cross-browser compatibility

KEY PROJECTS

1. E-Commerce Platforms

Tech: Django, Laravel, PHP, React.js, Next.js, MySQL, WordPress, Shopify, Shopware, AI

- Designed web architecture for multiple e-commerce platforms with AI-powered recommendations increasing conversion by 32%
- Developed responsive web design using front end languages (HTML5, CSS3, JavaScript, React.js) and programming languages (Python, PHP) achieving 55% page load improvement
- Integrated payment gateways with real-time inventory management, implemented SEO optimization improving organic rankings by 70%

2. Warehouse Management System with SAP EWM Integration

Tech: React.js, Node.js, MS SQL Server, PHP, SAP EWM, Printer/Scanner Hardware

- Architected comprehensive web architecture integrating SAP EWM for enterprise warehouse operations managing 10,000+ SKUs
- Applied Computer Science principles implementing printer/scanner hardware integration achieving 99.7% picking accuracy
- Built automated order fulfillment system using problem solving skills reducing processing time by 60%

3. Human Resource Management System with ChatGPT AI

Tech: PHP, Python, ChatGPT AI Integration, MS SQL Server

- Developed comprehensive HRMS using programming languages (PHP, Python) with ChatGPT AI reducing hiring time by 45%
- Created employee self-service portal with leave management, automated payroll, and biometric attendance integration
- Exercised management skills coordinating with stakeholders, demonstrated excellent verbal communication for requirements gathering

4. Project Management Software

Tech: Laravel, MySQL, REST API

- Built project management platform for 50+ team members demonstrating strong project management skills and organizational skills
- Developed Kanban boards, Gantt charts, time tracking with REST API integration to Slack, Microsoft Teams, Google Calendar

5. Logistics Application

Tech: React.js, TypeScript, Node.js, MySQL, Google Maps API

- Designed web architecture for logistics application with Google Maps API for real-time vehicle tracking and route optimization
- Built front end web interface using TypeScript reducing runtime errors by 40%, created analytics dashboards for fleet management

6. Inventory Management System

Tech: React.js, Node.js, MongoDB

- Developed cloud-based inventory system with automated reorder notifications and purchase order management module
- Created mobile-responsive front end web design for warehouse staff, integrated with multiple e-commerce platforms

7. Corporate Websites

Tech: WordPress, Laravel, React.js, Next.js, PHP, SEO Optimization

- Designed 10+ corporate websites with modern web design using WordPress and Laravel, developed custom themes and plugins
- Implemented Next.js for server-side rendering improving SEO performance by 60%, applied comprehensive digital marketing strategies

EDUCATION

Master of Computer Application (MCA) - Computer Science | Anna University, India | 2021-2023

Bachelor of Science in Computer Technology - Computer Science | Bharathiar University, India | 2018-2021

CERTIFICATIONS

CCNA (Cisco Certified Network Associate) - KHDA, Dubai - Networking & Security

Google Digital Marketing - SEO, SEM, Analytics

MERN Stack Development - GUVI - MongoDB, Express.js, React.js, Node.js

TECHNICAL EXPERTISE

- Web Architecture & Design: Expert in designing scalable web architecture, front end web development, modern web design principles
- Programming Languages: Proficient in JavaScript, TypeScript, Python, PHP, C# with strong Computer Science foundation
- Front End Languages: HTML5, CSS3, React.js, Next.js, jQuery, Bootstrap for responsive web design
- Full Stack Development: 4+ years building web applications across E-Commerce, HRMS, WMS, Solar Energy, Logistics domains
- AI & Enterprise Integration: ChatGPT API integration, SAP EWM integration, ERP systems, comprehensive REST API development
- Cloud & Infrastructure: AWS, Google Cloud Platform, IIS Server administration, Docker containerization, CI/CD pipelines, domain/DNS management
- Digital Marketing: SEO optimization, Google Search Console, backlink generation strategies, Google My Business, social media optimization
- Management Skills: Strong project management skills, management skills, organizational skills with Agile/Scrum methodologies

ADDITIONAL INFORMATION

Location: Burjuman, Dubai, United Arab Emirates | Visa Status: Employment Visa

Total Experience: 4 years 7 months (May 2021 - Present)

Languages: English (Professional), Tamil (Native), Malayalam (Conversational)

Key Strengths: Attention to detail, excellent verbal communication skills, verbal communication abilities, strong problem solving skills, superior organizational skills, proven project management and management skills

Industry Experience: E-Commerce, Solar Energy Management, Logistics, Warehousing, HRMS, ERP, Technology
